Zebra Data Services – IOTA Track & Trace

Presented by:

Robin West – Zebra Technologies

Jens Munch – IOTA Technology

Jose Cantera – IOTA Technology

January 20, 2021

What is Zebra Savanna™?

Discover your best next move
with Zebra Savanna™

Zebra's breakthrough intelligent edge platform:

- Collects and analyzes data from Zebra devices and sensors in real time
- Provides access to the aggregated cloud-stored data that has passed through Zebra devices
- Gives a more complete picture of your business
- Digitally transforms the way you work
- Zebra Savanna provides cloud connectivity for data through Zebra devices

What are Zebra Data Services?

Digitally transform how your business drives performance with a new series of applications and solutions

- Provides access to machine and transactional device data in addition to select data sources, combined to create insight, all accessible in the cloud
- Use data to create, trigger, search, and action APIs

For example:

- I want to scan an item and trigger a reorder.
 - I want to scan a driver's license, verify it, and put it on a label.
- Allows you to access and use APIs via a self-service portal

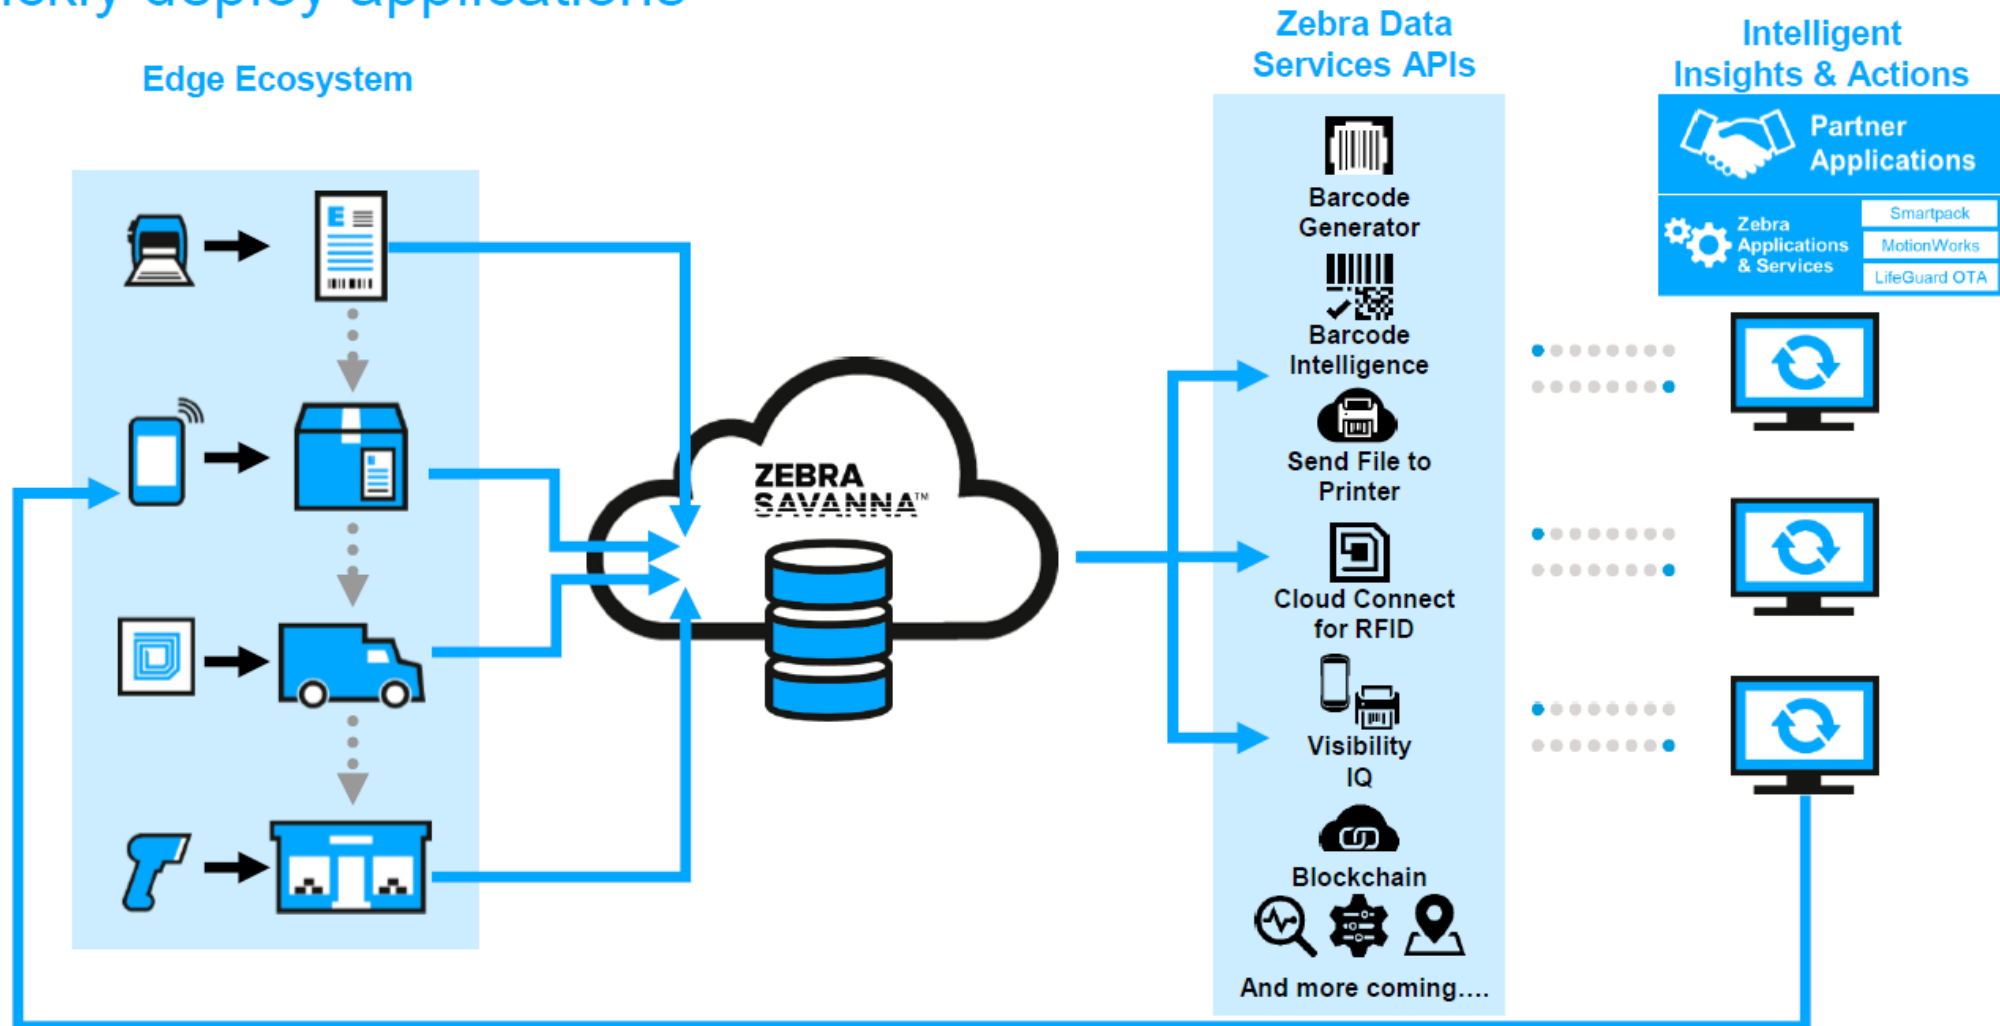

Leverage Zebra Data Services

APIs to:

- Improve current applications and create new solutions
- Integrate with your existing hardware, software, and data ecosystems, preventing costly updates
- Drive workflow efficiency and productivity

Zebra Data Services are the value-added API layer of Zebra Savanna

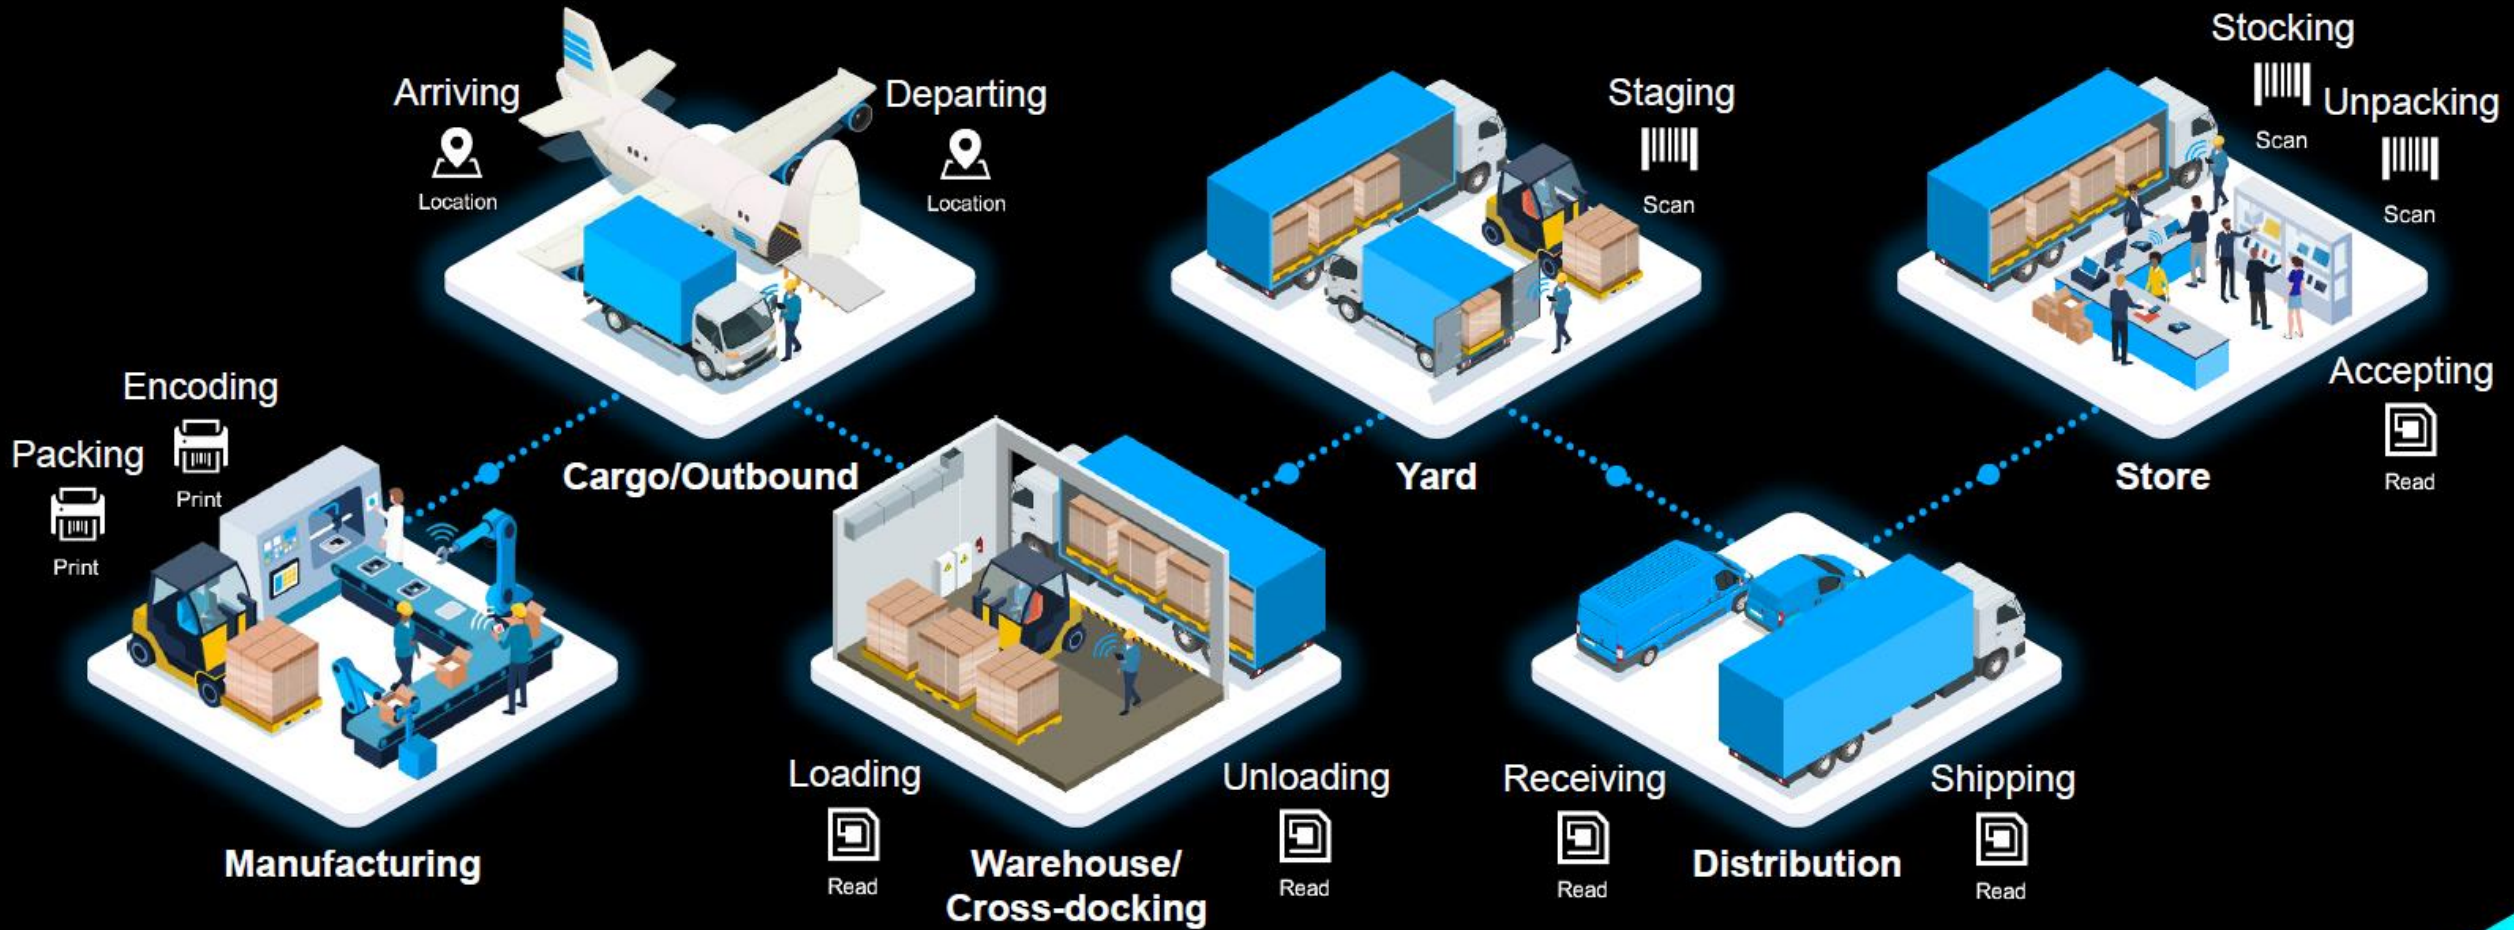

Zebra Data Services expose insights and data for customers to innovate, design and quickly deploy applications

Connectivity Services

- SendFileToPrinter - <https://developer.zebra.com/apis/sendfiletoprinter>
- Cloud Connect for RFID - <https://developer.zebra.com/apis/cloud-connect-rfid>
- VisibilityIQ - <https://developer.zebra.com/apis/visibilityiq>

End-to-End Visibility
